

# Integration Module Overview

## What makes Subscribe-HR Different?

The Integration Module provides users with multiple options relating to interfacing Subscribe-HR into third party/business applications e.g. Finance, Payroll, CRM, Accounting etc. The two core methods we utilise are: API using XML (SOAP) and CSV Middleware. We aim to harness the power and effectiveness of the internet to transmit information seamlessly, cost effectively and securely between Subscribe-HR and other business systems. Web integration is mainstream now with Banks, Payment Systems, Global Social Networking, ERP Systems and Government Agencies all utilising Web Services to streamline, standardise and simplify the way information is shared and collaborated. Web 2.0 + standards and methodologies are a key driver to how Subscribe-HR leverages the internet to provide our customers with the tools and the ability to dove-tail the Subscribe-HR system into both the National and International business landscapes. The CSV Middleware Integration tool can be configured to act as the data validation point that exists between Subscribe-HR and the client, sending and receiving data based on pre-defined processing and validation rules.

### SOAP SAMPLE:

queryObject Request

Query Employee object For Surname, First Name, First Aid Renewal, Date of Birth, Employment Type, Mobile Where Payroll Number = SUBSCRIBE-HRCLIENT1001

```

<?xml version="1.0" encoding="UTF-8"?>
<SOAP-ENV:Envelope xmlns:SOAP-
ENV="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:xsd="http://www.w3.org/2001/XMLSchema"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns:SOAP-
ENC="http://schemas.xmlsoap.org/soap/encoding/"
xmlns:ns1="http://xml.apache.org/xml-soap" xmlns:ns2="http://www.subscribe-
hr.com/ns/" SOAP-
ENV:encodingStyle="http://schemas.xmlsoap.org/soap/encoding/">
  <SOAP-ENV:Header>
    <ns2:authenticationToken>
      <username>subscribeh</username>
      <password>12345678</password>
    
```
